Manulife Global Clean Energy Equity Feeder Fund

The Fund is an equity feeder UITF that aims to maximize total return by investing its assets in a collective investment scheme (CIS), the Target Fund. The Target Fund aims to achieve capital growth by investing at least two-thirds of its total assets in listed equity securities of companies that contribute to the reduction of carbon emissions. It also aims to achieve a positive environmental and social impact by investing at least two-thirds of its total assets in companies supporting the structural change towards a sustainable, low-carbon economy, helping to reduce greenhouse gas emissions and air pollution.

Why this Fund?

Clean energy promises a better and smarter future, not just in power generation, but also in a range of innovative technologies and applications including green buildings, efficient manufacturing and smart electric vehicles.

Join the transition to a world powered by clean energy

With energy demand set to continuously increase well into the future, there is a massive long-term investment potential in clean energy as nations and companies transition to clean energy amid supportive legislation, technology innovation and the need for energy independence and security.

Access the long-term growth potential of leaders in the clean energy transition

Invest in a portfolio of companies across the entire clean energy ecosystem, from renewable energy and electric vehicles to the technology and infrastructure that support them.

Capitalize on the proven track record of a pioneer in thematic equities

Leverage a strategy managed by Pictet Asset Management, a pioneer in thematic equities with a long track record and a proven approach to responsible and sustainable investing.

Start investing in your future, today.
