Manulife Global Thematic Opportunities Equity Feeder Fund

The Fund is an equity UITF structured as a feeder fund that aims to maximize total return by investing its assets in a collective investment scheme (CIS), the Target Fund. The Target Fund aims to achieve capital growth by investing mainly in equities and equity related securities issued by companies throughout the world. The Target Fund applies a sustainable strategy which aims to achieve a positive environmental and social impact by investing mainly in companies that benefit from global long-term themes resulting from secular changes in economic, social and environmental factors such as demographics, lifestyle or regulations.

Why this Fund?

Investing in global equities using a thematic approach is very different from traditional investment styles. Fund Managers identify themes underpinned by secular megatrends set to structurally change the way we live, how society operates, and how business gets done. Stocks representing different themes are selected based on how well the managers believe these stocks are positioned for the future as it's defined by these deep structural changes.

Harnessing the power of global megatrends

A portfolio of stocks that are leveraged to megatrends, thematic investing may offer exposure to future generations of global market leaders.

Diversification benefits

Unconstrained opportunities across sectors, regions and market cap creates a universe that has low overlap with global equity indices.

Sustainable approach

A positive impact target fund that considers ESG factors and targets activities that contribute to an environmental or social objective.

Start investing in your future, today.
